OBJECTIVE	Provide solutions to real-world problems and create everyday convenience as an AI Engineer.
WORK EXPERIENCE	2023/08 – 2023/12 AI Engineer, Tomocube Inc., Seoul, Korea - Developed SAM-based web image auto-annotator for cell image. - Built an LoRA-based MLOps retraining pipeline on curated data for user-tailored updates. - Deployed FastAPI, Docker backend with MySQL and a GPU job queue for training/inference.
EDUCATION	2017/03 – 2024/02 Pukyong National University Department of Industrial and Management Engineering & Technology and data Engineering <i>B.S. in Systems Management and Engineering (GPA: 4.1 / 4.5)</i> 2024/03 – 2026/02 Pukyong National University Department of Industrial and Data Engineering <i>Master Student (GPA: 4.44 / 4.5)</i>
SKILLS	Programming: Python, JavaScript AI Tools: OpenAI Codex, Cursor ML/DL: PyTorch, Diffusers, LoRA, OpenCV, LangGraph, Numpy, Pandas Experiment & Serving: CUDA, Tensorboard; FastAPI, Docker, Github Actions, AWS Databases: MySQL, PostgreSQL+PGVector
PAPERS	Jung, K.; Seo, Y. ; Jung, Y.; Cho, S.; Kim, J.; Min, H. S.; Choi, S.; “ Controlling Augmentations for Balancing Invariance and Diversification in One-Shot Image Classification. ” <i>Neurocomputing</i> . (2026) Seo, Y. ; Noah, L.; Min, H.S.; Choi, S.; “ T-RADAR: Simulating Trademark Examination as an Interactive Retrieval Interface for Conflict Risk Assessment. ” <i>International ACM SIGIR Conference on Research and Development in Information Retrieval Demonstration Track</i> . (2026) Seo, Y. ; Min, H.S.; Choi, S. “ STELLAR: Scene Text Editor for Low-Resource Language and Real-World Data. ” <i>The Association for the Advance of Artificial Intelligence (AAAI) Workshops Oral</i> . (2026) Seo, Y. ; Kwon, Y.; Lee, N.; Jung, K.; Cho, S.; Jang, S.; Choi, S. “ KIMCHI: Korean Diffusion Model Adapting Culture and History. ” <i>Society for Computational Design and Engineering 2025 Winter Conference Oral</i> . (2025) Jung, K.; Seo, Y. ; Cho, S.; Kim, J.; Min, H. S.; Choi, S. “ DALDA: Data Augmentation Leveraging Diffusion Model and LLM with Adaptive Guidance Scaling. ” <i>European Conference on Computer Vision (ECCV) Workshops Oral</i> . (2024)
PATENTS	Choi, S.; Seo, Y. ; Jung, K. “ AI Agent-based Composite Similarity Calculation System and Method for Trademark Search and Registration. ” <i>Korean Patent Application (Filed)</i> No. 10-2025-0165072, Filed Nov 5, 2025. Choi, S.; Jung, K.; Seo, Y. “ System and Method for Creating Fire Image for Training Artificial Intelligence Model. ” <i>Korean Patent Application (Published)</i> No. 10-2025-0021779, Published Feb 14, 2025. Filed Aug 7, 2023.
PROJECTS	2026/05 – 2026/06 PARAVOCA: A planning and marketing AX agent for turning tourism data into travel products - Multi-agent Ennoia workflow that turns travel inputs into verified attractions, product plans, proposals, marketing copy, checklists, and AI posters. - Excellence Award, 2026 Tourism Data Utilization Contest (Tourism Prompthon Using Generative AI category) 2024/08 [Hackathon] Gymnius: Developed a demo app for automatic exercise logging and recommendation - Implemented voice-based exercise logging with Whisper API, and used Upstage Solar API for data parsing, and workout recommendation - Developed backend server and performed prompt engineering - Awarded Excellence Prize
